

BERYN HAMMIL DESIGNS MONTHLY

April 2008

WHILE THE FAMILY WAS ON VACATION THEIR HOME OFFICE WAS COMPLETELY REMODELED.

home office remodel installed while the client went on vacation!

Can you believe that this home office was once piled high with papers, redundant computer hardware, a sagging sleeper sofa, and white laminated bookcases from college days? Not any longer!

After months of planning about how the space could be more efficient, cabinets were designed to suit the needs of a two-person home office. New carpeting was selected,

furniture designed, and paint colors blended.

And then the family went on vacation, leaving Beryn Hammil to oversee the project.

Everything old was removed, and painting started, new carpeting laid down, and recessed lighting installed in the cathedral ceiling. Then, after weeks of hard work, the cabinets came in and the room came together perfectly. Finally, the custom-made sleeper sofa,

table lamp, and accessories were placed just as designed.

Beryn Hammil Designs planned the entire concept and implementation, ensuring that the client's vacation was undisturbed, and their return home something to look forward to, despite their jet lag!
